## Save time & money

Increase security by focusing on remediating vulnerabilities that are a part of a validated attack path to a business process or critical asset

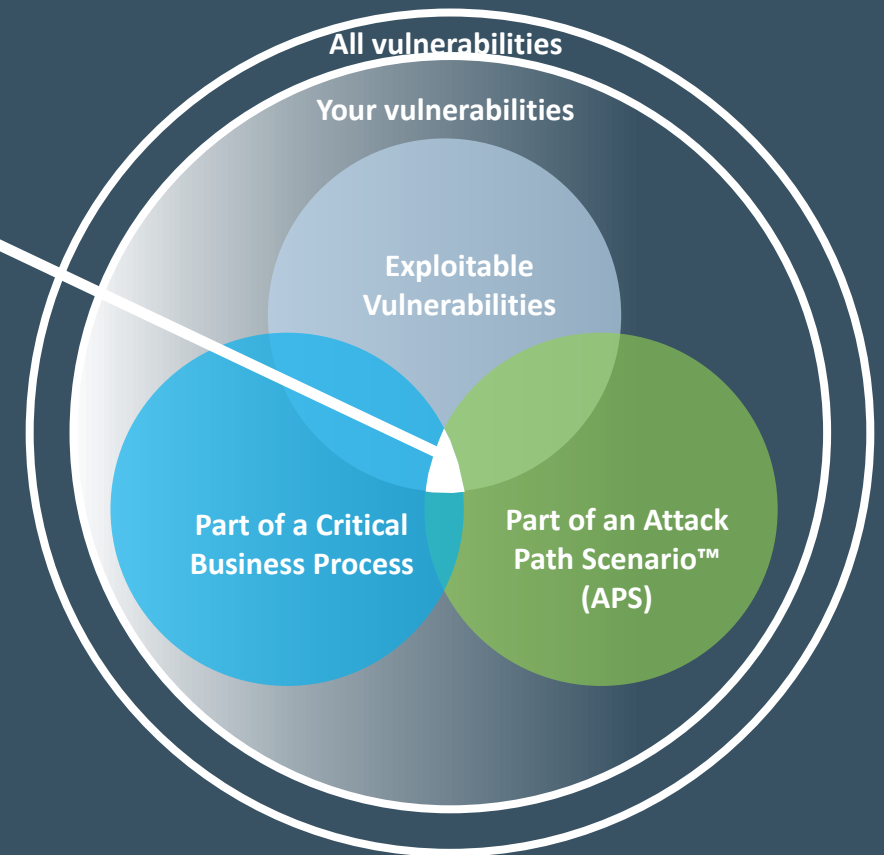

Identify Global  
Attack Path  
Scenarios™

Infrastructure  
and Web  
Scanning

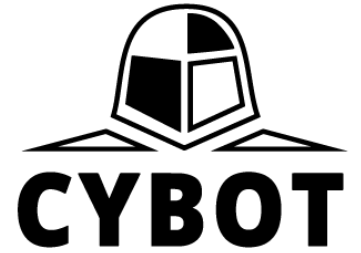

Effective remediation,  
focus on threats to  
business processes

# Cronus - CyBot

## Key features:

- Creates actionable insights based on critical vulnerabilities that threaten your business process for immediate alerts and remediation with one click
- Continuous silent vulnerability scanning on all IP based devices on premise or in the cloud
- Automatically detects critical assets and finds how hackers could reach and threaten them, no human involvement required.
- Cronus is certified for Penetration Testing by CREST
- Help comply with GDPR – require regular pen testing, vulnerability management and greatly reduces the risk of breach to your sensitive data.

# Fully commercial, award winning product
